## Curriculum

### Unit-1: Basic Concepts in Chemistry

Acidity, Basicity  $P_H$ ,  $P_{oh}$ . Ostwald dilution law. Law of mass action,  $K_c$ ,  $K_b$  &  $K_a$ . Indicators, Theory of indicators, Range of indicators Neutralization, neutralization curves, Equivalent & molecular weight, concepts of oxidizing & reducing agents.

**Unit-2 :** Gaseous, Solid & Liquid State Chemistry Behavior of Gases: Kinetic theory of gases, deviation from ideal behaviors and explanation

Solid State: Crystalline structures, lattices, physical properties. Adsorption: Freundlich and Gibbs adsorption isotherms, Langmuir theory of adsorption isotherms Liquid State. Physical properties

(Vapour pressure, surface tension, Heat of formation, viscosity, refractive index, optical activity, dipole moments and chemical constituents). Solutions: Ideal and real solutions, partition coefficient conductance and its measurement

### Unit-3: Thermodynamics and phase rule

Thermodynamics: first, second and third laws, Zeroth law, phase equilibria and phase rule.

### Unit-4: Chemical Kinetics

Chemical Kinetics: Zero, first and second order reactions, theories of reaction Kinetics, acid base catalyzed reactions,

Brief Report of Certificate Course in Electronic Equipment Maintenance

Academic Year: 2018-19

**Aim:** To introduce the students with working mechanism of various electronic equipments useful in daily life and acquaint them with basic skills of repairing and maintenance of these equipment.

**Objectives:** To make the students familiar with the use of lab equipments, testing of electronic equipments and various repair and maintenance techniques.

**Duration:** 30 days

**No. of Beneficiaries:**

**Expected Outcome:** The students will be able to gain an understanding of working principles of various electronic equipments and can identify the faults to repair and maintain it. Also, they will be able to design, assemble basic circuits.

## Brief Report of the Course

Electronic equipment maintenance is a 30days certificate level course in physics and electronics. The course duration was from 01 Sep 2018 to 05 Oct 2018. For this certificate course ---- students enrolled themselves and have taken the benefits of this course. This course is an introduction to i) basic scientific principles and working of electronic instruments ii) designing electrical circuits and iii) basic techniques of repair and maintenance. Students successfully completing this course will be able to identify various electronic components, can analyse basic electronic circuits and gain the understanding of the working of these equipments. The course will also explain students the calibration and testing of the equipments, soldering techniques and basic servicing skills. Students will also gain the brief insight of electrical & electronics materials, basic computer techniques and can get elementary workshop practice.

## Curriculum

### UNIT-I

Introduction: Meaning of research, Objectives of research, Motivation in research, Types of research, research approaches, significance of research, research and scientific method, importance of knowing how research is done, research process, criteria of good research.

Research Problem: Concept and Need, identification of research problem, defining and delimiting research problem, research questions and hypothesis, variables and their linkages, characteristic of good hypothesis, research question and formulations of hypothesis- directional and non-directional hypothesis, basis for hypothesis.

### UNIT-II

Literature Review: Place of literature review in research, bring clarity and focus to research problem, improve methodology, broaden knowledge base in research area, develop a theoretical framework, develop a conceptual framework, writing up the literature reviewed.

Research Design: Meaning of research design, need for research

design, features of a good design, important concepts relating to research design, different research designs.

### UNIT-III

Methods of data collection: Collection of primary data, observation method, interview method, collection of data through questionnaires, collection of data through schedules, difference between questionnaires and schedules, some other methods of data collection, collection of secondary data, selection of appropriate method for data collection.

Processing and analysis of data: Processing operations, some problems in processing, statistics in research, measures of central tendency, simple regression analysis, multiple correlation and regression, partial correlation

## Evaluation

- **Quizzes: 10%** To reiterate, expected to do all assigned readings by the start of each week. Teachers monitor the progress of students reading by performance in quizzes to be given on unannounced dates. There are ten Quizzes in total. Teacher considers student eight best performances to calculate this final grade. There is no makeup for these quizzes.
- **Presentations: 10%** Expected two give presentations in front of class members. While too separate dates. Instructions are given at least a week before each presentation.
- **Written exam: 40%** There are non cumulative exams. The exam covers two papers.
